# **Original instructions** Instruction manual

# Important!

Read this instruction manual carefully before first operation and strictly observe the safety regulations!

# **Original instructions**

#### 1 General

Read this instruction manual carefully before first operation and strictly observe the safety regulations!

Changes to the scope of supply in form, technology and equipment are reserved. No claims can be derived from any information and figures in these original instructions.

The original packaging and, at the end of its service life, the sprayer must be properly disposed of according to the local environmental regulations. The machine can be subject to national rulings for regular review by designated offices, as specified in directive 2009/128/EC.

#### 2 Scope of delivery

- Basic unit with hand valve and pressure hose
- Spray tube
- Pre-installed nozzle assembly incl. nozzle
- Assembly parts cap but, O-ring
- Carrying belt
- Rechargeable battery
- Charger

#### 3 Wear parts

The following wear parts are not subject to the manufacturer's guarantee:

\* All rubber parts that come into contact with spraying liquid, \* nozzles, \* filters, \* seals, \* rechargeable battery

#### 4 Warranty

Please observe that specific warranty conditions are valid in some countries. In doubt, ask your vendor.

No guarantee can be granted for any damage caused by:

- Non-observation of the original instructions.
- Omission of necessary maintenance and cleaning work.
- Wear and tear from regular use
- Use of unapproved working tools.
  Use of force, improper treatment, abuse or accident.
- Manipulations by non-qualified persons or from improper repair attempts.
- Unauthorized modifications to the device.
- Use of unsuitable spare parts or non-genuine spare parts.
- Use of unapproved chemicals or dilutions.

• Damage caused by use in the rental business. Any warranty work must be performed by one of our authorised specialist vendors. Cleaning, care and standard adjustments are not accepted as warranty services.

# For Australia only: Supplementary warranty notes specifically for Australia

To make a claim, contact Clayton Engineering, 26 French Ave, Brendale, Q, 4500 on phone 1300 798 022 or email sales@claytonengineering.com.au. You will be asked to provide proof of purchase and then will be instructed on the procedure for repairing or replacement of the product under warranty. All costs incurred for repair or replace, and additional claims can be discussed at this stage.

This warranty is provided in addition to other rights and remedies you have under law: Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

#### 5 Symbols

| 63         | Read the original instructions thoroughly.   |
|------------|--|
| À          | DANGER! Non-observation of the original operating manual may cause accidents with injuries.  |
| R          | Wear the prescribed protective clothing.   |
|            | Wear protective gloves.  |
|            | Wear facial protection (e.g. goggles).   |
|            | Wear breathing protection.   |
|            | No smoking.  |
|            | No open fire.  |
|            | Minimum distance from other persons: 15 m [approx. 16 yards]   |
| X          | Electrical equipment must not be disposed<br>of as normal domestic waste.<br>Ensure that the device, the rechargeable<br>battery and all electrical accessories are<br>disposed of or recycled at an official<br>disposal or recycling facility for electrical<br>equipment. |
| $\bigcirc$ | The device and the battery must not be exposed to splashing water or precipitation.  |

# 6 Safety provisions

#### 6.1 Intended use / applications

- Use the device only for application of liquid herbicides, pesticides and weed killers as well as liquid fertilisers that are available in authorised specialist trade and approved by local/national authorities for use with portable spraying devices and for application of clean water.
- Strictly observe the information on the spraying agent, in particular instructions on personal protective equipment.
- Application areas are in farming, tree nurseries, forest operations, orchards, vineyards, market gardens, as well as glasshouse cultures with sufficient ventilation and venting.
- The device must not be used for any other purposes, such as application of other agents from the above liquids! In particular, no acids, alkalis, solvent-containing liquids and waterproofing agents must be applied.
- Never use any liquids with temperatures above 40 °C [104 °F].
- Do not use any flammable agents.

#### 6.2 General safety notes

Read the original instructions before first use and keep it in a safe place.

Non-observation of information provided in these original instructions may potentially be fatal; the user is liable for any damage, direct or consequential, caused by this.

The original instructions must be kept on hand at the site of use of the sprayer at all times. It must be read by all who are charged with any work with and on the device (including for maintenance, care and repair).

- Have safe use shown and explained to you by a SOLO specialist vendor.
- Persons under the age of 18 must only work under supervision with this sprayer.
- Persons with medical implants must consult a doctor before using the device or request information from the implant's manufacturer.
- Keep persons and animals away from the working area. Never spray in the direction of any persons, animals or objects that could be hurt or damaged.
- This sprayer must only be passed on to persons who are familiar with this model, its operation and the original instructions.
- If you work with this sprayer, you should be physically fit, rested and healthy.
- Do not use the sprayer while under the influence of alcohol, drugs or medication.
- Never make any changes to existing safety provisions and operating parts.

- Only use the sprayer when it is operationally safe to do so. Check the sprayer before every use according to chap. 10.1.
- Replace damaged parts without delay. Only use SOLO genuine spare parts.
- Only use the genuine battery. Accessories and batteries must be approved for this device.
- Empty and clean the sprayer according to the information in chap. 10.4 for this. Prevent unauthorised access to the machine.

In case of serious disturbances such as smoke development or strong odours remove the unit from your body. If there aren't flames yet and the battery is not too hot, remove the battery from the device and place it on a fireproof surface. Keep a sufficient safety distance. In the event of a fire, call the fire brigade immediately. Have the equipment checked immediately by an authorized specialist workshop.

#### 6.3 Safe handling of spraying liquids

- Follow suitable procedures and use collection containers to prevent any contamination of the environment, the public waterways and/or storm water systems from chemical agents and cleaners. This can happen while mixing, filling, using, emptying, cleaning or during transport.
- Always collect chemical spray liquids and cleaners (including residues) in suitable containers and return them to collection points specified by the municipal administration.
- In case of skin or eye contact, rinse or flush the affected body parts with plenty of clean water. Seek medical advice without delay.
- Contaminated clothing should be changed at once.
- Never eat or drink while handling spray liquids
- If you feel nauseous during work, or if you are excessively fatigued, stop working at once. If the condition persists, seek medical advice without delay.
- Never permit children or persons work with or handle spraying liquids if they are not familiar with these substances.
- Never fill different spray solutions into the spray tank.
- The description of the kind of spray solution used must be attached to the device and must be updated with every change of the spraying solution.
- When changing the spray solution, clean the spray tank and all parts that come in contact with the spray solution. Operate the sprayer with clear water first before filling the spray tank with the different spray solution.
- At the end of work, empty and clean the sprayer according to chap. 10.3, clean your face and hands thoroughly, take off work clothing and wash it regularly.

# 6.4 Safe handling of the rechargeable battery and the charger

- The charger must only be used to charge the original battery of this battery backpack sprayer indoors.
- The mains must correspond to the information on the charger in value, type, and frequency of the operating voltage. The socket must match the mains plug of the charger precisely.
- Do not charge during long-term absences (holidays).
- After charging disconnect the charger from the power supply immediately.
- Always hold the body of the plug when plugging it in and disconnecting it. Never pull it out by the cable.
- Never connect the two terminals of the rechargeable battery (+ / -) with a conducting object (short circuit). Make sure there cannot be any short circuit of the contacts when charging the battery outside of the device.
- When cleaning the charger, the main plug must be disconnected from the mains. Keep the charger, the rechargeable battery and all of the electronics well away from splash water. These areas should only be cleaned with a dry or slightly damp cloth.
- The rechargeable battery contains dangerous substances. Never open the battery or the charger.
- Only use the genuine charger to recharge the battery.
- Never mail any defective/used-up batteries anywhere.

# 6.5 Work clothing /personal protection equipment (PPE)

Suitable and approved protective clothing that protects all body parts from contact with the spray solution must be worn.

• Wear firm shoes with good gripping soles.

Wear protective gloves with a slip-proof palm.

Use facial protection (e.g. protective goggles).

Always wear a breathing mask. when working in dense, tall plants, greenhouses, troughs or trenches and when using

dangerous spraying agents.

# 6.6 Before and during work

- Before starting work, always check the entire device for operational safety according to chap. 10.1.
- The sprayer must only be operated by one person. There must be no other person within a radius of 15m [approx. 16 yards].
- Always ensure sufficient air exchange in dense plant growth, in greenhouses, troughs or trenches.
- Always stay within calling distance from other persons that may provide help in emergency.
- Take regular working breaks to prevent fatigue.
- Do not smoke at the workplace.
- In case of serious disturbances or accidents during operation of the device as smoke, strong odors from the device or if the device is in flames instantly remove the unit from your body and take a safe distance. In case of fire, you have to call the fire department immediately.
- When switching on the pump, ensure that the shut-off valve is closed. Point the spray tube towards a free area.

# 6.7 When transporting the sprayer

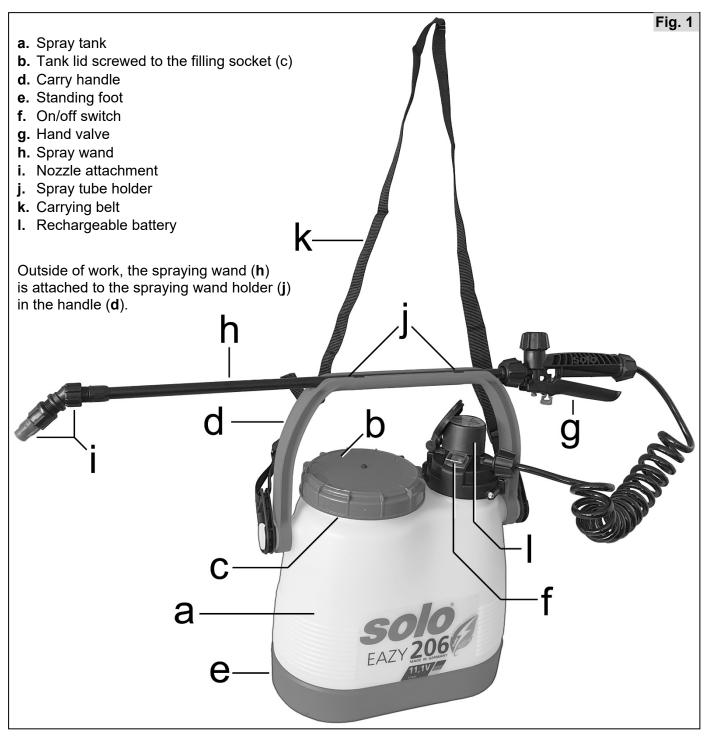

- Always switch off the pump when transporting the device.
- Depressurise the device in accordance with chap. 9.2.
- The device must be securely strapped down when transported on vehicles.
- Prevent leakages of spraying agents. The liquid tank of the sprayer and all liquid carrying hoses must be inspected regularly for leaks.

# 6.8 Maintenance, repair and storage

Only perform maintenance and repair work yourself that is described in these original instructions. All other work must be carried out by an authorised specialist workshop.

- Do not service, repair or store the sprayer near open fire.
- Always turn off the pump before any maintenance and repair work.
- The pressure hose, hand valve, spray wand and nozzle assembly must only be unscrewed when the sprayer is depressurised. For this, keep the spray tube in the spraying agent tank or a suitable collection container with the pump turned off for the spraying agent until liquid is no longer being transported.

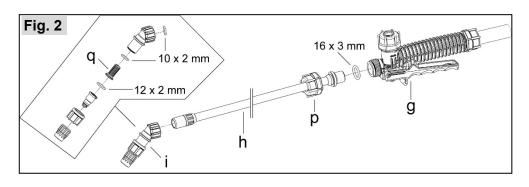

#### 7 Work preparation

# 7.1 Assembly

Assembly of the spraying wand (h):

- Start the cap nut (p) evenly and screw the spray tube with the Spritzrohr mit O-ring (16x3 mm) onto the hand valve (g) hand-tight without tools.
- Screw the nozzle attachment (i) onto the spray tube hand-tight without tools.

#### Assembly carrying belt

• Attach the carrying belt to the side fastenings as shown and adjust to the required length.

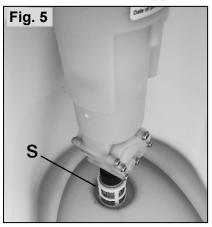

#### 7.2 Filter, filling screen and intake screen

#### Fig. 2:

The nozzle assembly (i) includes a filter (**q**) insert in front of the nozzle.

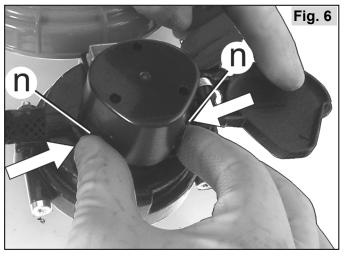

The basket in the filling neck ( $\mathbf{c}$ ) of the liquid tank contains a filter screen( $\mathbf{r}$ ).

The intake screen (**s**) is pushed on at the intake manifold to the pump of the spraying agent tank. The filter  $(\mathbf{q})$ , filling screen $(\mathbf{r})$  and intake screen  $(\mathbf{s})$  are required when using the device.

### 7.3 Charging the battery

Before removing the rechargeable battery from the device, always switch the on/off switch to "0"!

To remove the rechargeable battery from the device, compress the two latching levers (n) to unlatch the battery, and then take out the battery upwards.

The rechargeable battery needs to be charged before you can use the pressure sprayer for the first time.

Charging time: Approx 2 hours

Place the charger on a stable support and connect it to a suitable mains.

Before replacing the battery, make sure that the battery and charger contacts are clean, dry, and free of foreign bodies.

Push the battery into the charger in the proper position (according to the figure).

While the battery is charging, the LED on the charger lights up red. Once the battery is fully charged, the LED switches to green.

After charging, remove the battery from the charger upwards and disconnect the charger from the mains. Before replacing the battery, make sure that the battery and unit contacts are clean, dry, and free of foreign bodies.

Put the battery into the device in the correct position (according to the figure) from above until it latches noticeably. Check that the battery is seated securely.

#### 7.4 Test run

Before its initial use, the sprayer should be tested according to chapter 10.2.

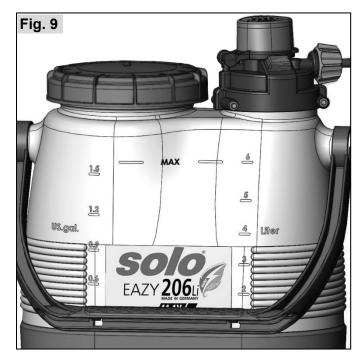

# 8 Preparing the spray liquid and filling the spray tank

Prepare the spray liquid according to the instructions of the chemical manufacturer.

Always prepare the spray liquid outdoors, never in living quarters, stables or storage rooms for food and animal feed.

To fill the spray tank, always remove the rechargeable battery from the unit and close the protective cover for the rechargeable battery compartment.

When filling the spray tank, always use the filler basket with the integrated filter screen  $(\mathbf{r})$ .

Fill the tank no further than to the upper-most mark (**MAX**) of the spray tank.

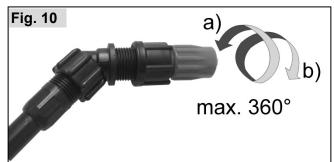

Overfilling the tank or spills can contaminate public waterways, rain- and storm water channel and must be avoided.

Wipe off spilled spray liquid without delay.

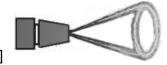

#### 9 Use of the device

- Do not use the sprayer in wind or rain.
- Check the direction of the air movement before starting work and spray with the air movement, not against it.
- Do not spray towards persons, animals, open doors and windows, cars or other objects that may be hurt or damaged by the spray.
- Ensure that only the actual spray target will be wetted. Always aim to obtain even and homogenous distribution of the spray on the treated surfaces.

Nozzle adjustment:

a) Nozzle closed → hollow cone Delivery rate at 2.5 bar: 0.6 l/min [0.158 USgal/min]

b) Nozzle open (1/2 turn 180° until max. 1 turn, 360°)

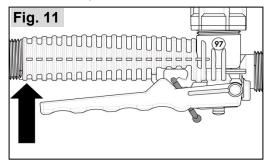

→ coarse and narrow jet

Delivery rate at 2.5 bar: 1.6 l/min [0.422 USgal/min]

#### Spraying:

When the hand valve (**g**) is closed (hand valve not actuated), turn on the pump with the on/off switch (**f**).

Hold the spray wand with the hand valve.

To spray, depress the hand lever on the valve. Release the hand valve lever to stop spraying. To spray the underside of leaves, lightly loosen the spray wand cap nut and turn the wand hand tighten again.

An uneven spray picture or reduced spray output from the nozzle may require cleaning of the nozzle filter insert and nozzle (chap.10.3) or the replacement of these parts.

If the spray output is clearly reducing, end spraying and charge the battery. (chap. 7.4)

Always turn the pump off with the on/off switch during work interruptions in which the device is placed on the ground.

## 9.1 Disposal of residual spray volume

Residual spray volumes of less than 200 ml [6.8 oz] are no longer pumped effectively. Either add more spray formula and continue spraying or, when finishing off, dilute the residual volume with 2 litres [68 oz] of clean water and apply to the already treated area.

At the end of work, turn off the pump with the on/off switch, empty and clean the device according to chap. 10.4, clean your face and hands thoroughly, take off work clothing and wash it regularly.

### 9.2 Ending spraying

At the end of work, turn off the pump with the on/off switch.

In order to depressurise the device, keep the spray tube in the spraying agent tank or a suitable collection container with the pump turned off for the spraying agent until no liquid escapes anymore. Remove the battery and store it securely. Empty and clean the device according to chap. 10.3, clean your face and hands thoroughly, take

off work clothing and wash it regularly.

# 10 Maintenance, cleaning and storage

#### 10.1 Maintenance plan

Before starting work:

- Check the entire sprayer is operationally safe by:
  - o Visual inspection of the sprayer
  - Checking the tightness of all parts (with the hand valve opened and closed).
  - Checking the working of all functional parts (on/off switch, hand valve).
  - Checking the hoses and their screw connections.
  - Visual inspection of the filter screen in the filler basket.

After the end of work, when changing the spray formula, whenever required:

- Cleaning the spray tank chap. 10.3
- Cleaning the nozzle and filters chap. 10.3
- Cleaning the filter screen in the filler basket chap. 10.3

# 10.2 Test run

When the spraying season starts and then every month, the following items must be checked in a test run with clean water:

- Tightness of all device parts in pump operation with the hand valve opened and closed
- Function of the hand valve; no spraying agent must escape with the hand valve closed (hand valve not actuated).
- Dosage and distribution accuracy

In case of irregularities, damage, leaks or limited function, do not use the sprayer but have it checked in a specialist workshop without delay.

# 10.3 Empty the spray tank and clean all the parts in the spray delivery system to the nozzle

Turn off the pump, depressurise the device, remove the battery, and store it securely. Empty the spray tank, flush with clean water all parts in the delivery system to the nozzle and the filter screen in the filler basket.

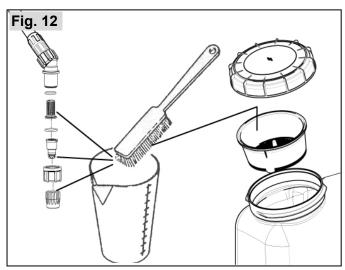

Give special attention to the wear parts such as nozzle, filters and seals.

Observe the cleaning notes in the original user manual for the chemical.

Never use any aggressive, acid- or solventcontaining cleaning agents (e.g. petrol).

After cleaning, let the spray tank dry in the open air.

#### Clean the spraying nozzle, filter and filling screen:

- Flush the nozzle assembly with clean water.
- Unscrew the nozzle assembly.
- Clean the O-rings, filter insert, spray nozzle and filling screen with clean water and a soft brush. Never blow out the spray nozzle with the mouth! Never clean nozzles with hard objects!
- Screw the parts of the nozzle assembly back together (Fig. 2).

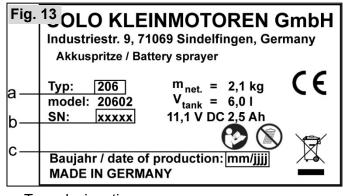

# 10.4 Down periods and storage

Turn off the pump, depressurise the device, remove the battery, and store it securely. Empty and clean the sprayer according to chap. 10.3.

Keep the sprayer protected from sunlight in a dry, frost-free and secure location at a temperature of max.  $35 \degree C$  [95  $\degree F$ ].

Prevent unauthorised use - especially by children.
